Login Screen

This is the initial screen from the program where the user logs in as their user name or an admin can log in with "admin"

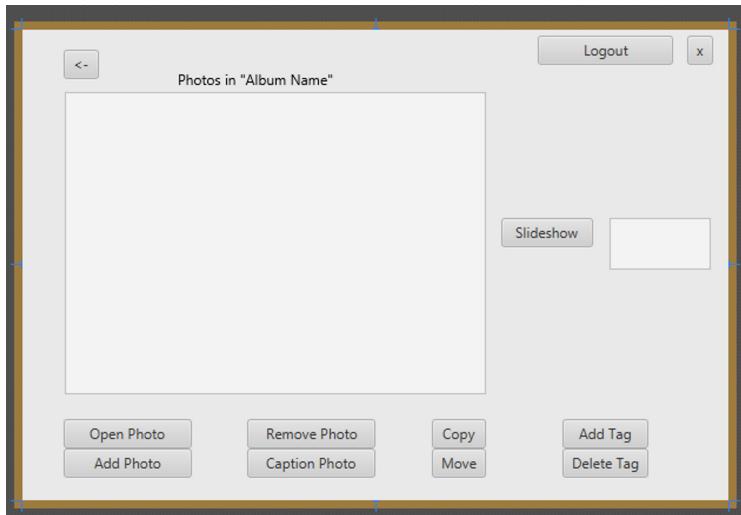

Admin Screen

This is the admin screen after logging in where you can list users, add new users or delete a user. The display on the top will show the user list once the list user button is pressed. There is a logout and quite button on the top right that will stay there in every scene

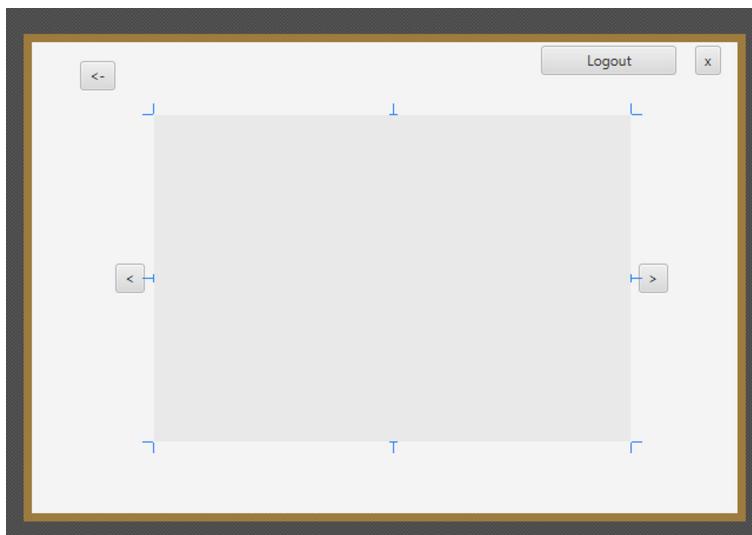

User Screen / albums

This is the user screen after logging in Where you can Open, create, delete or Rename an album. The user Albums will be Loaded In the panel up top . It also lets your Search a photo by tag / date range etc by choosing one from the list next to it and then Create an Album by Search

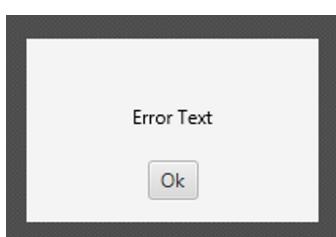

User Screen / Photos

This is the Photos Screen after selecting a certain album that lets you Open, Add, Remove, Caption, Copy and Move photos. There is a Slideshow button with a list to choose if you want to start the slide show in forward or backward sequence. Create Album button lets you create an Album from the Search results

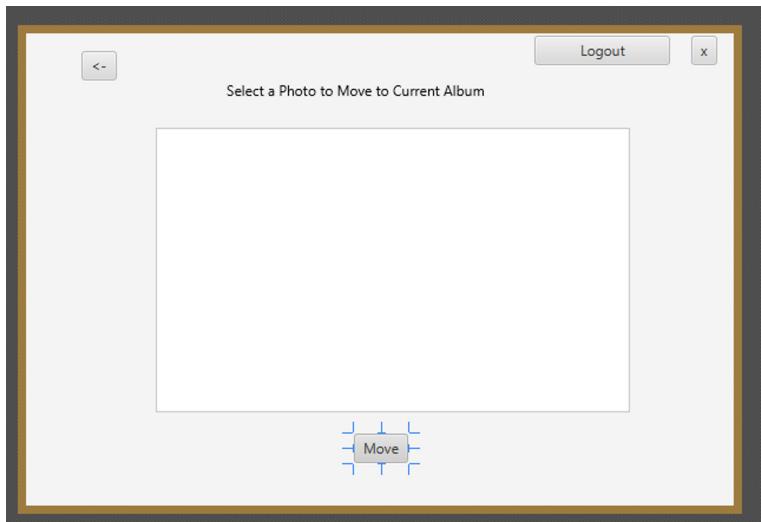

User Screen / Slideshow

This is the Slideshow scene that has the usual logout and quite button, along with a back button to take you back to Photos scene, and Image View panel to view the image and last image "<" and next image button ">".

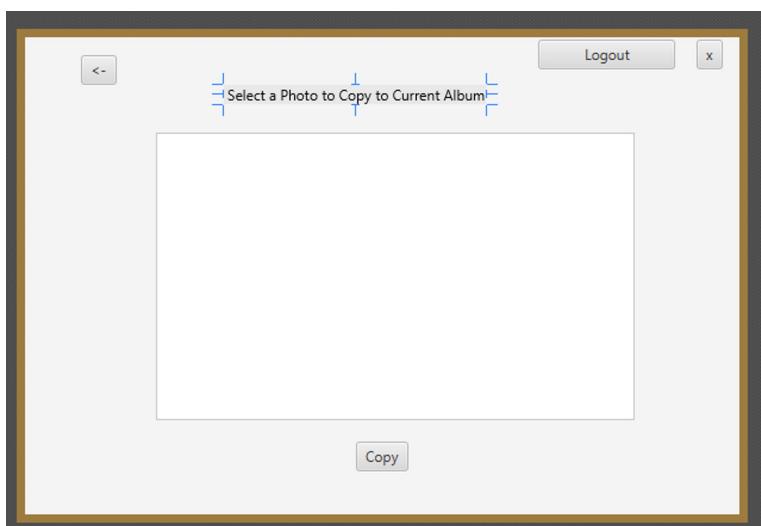

Error Dialogs

This is the generic Error pop up text box that displays the appropriate error and an Ok button to quit out of the error pop up.

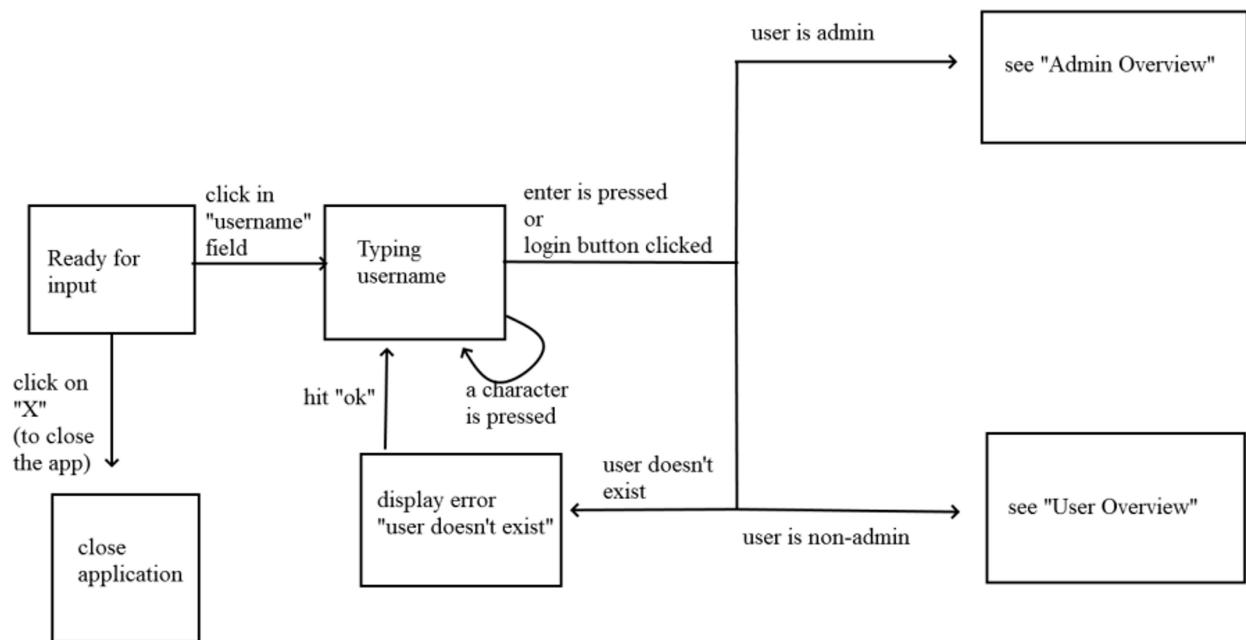

Move Screen

Copy Screen

Copy and Move Scenes Where u select photos from another album to copy to the Album that was opened
